Skills

- **Dev ops**
- **Cloud computing**
- **Machine learning**
- **Data analysis**
- **Systems and network**
- **Data encryption**
- **Ruby**
- **Java Script**
- **C++**
- **SQL**
- **Statistics**
- **Jira**
- **Html**
- **Knack**
- **Miro**

Experience

I have been working with the ITEXPINFO, I have been working with multiple tools like jira, sql, java script, etc… i have experience on creating test case and use case for multiple product with my team and making a plan on jira tool, divided to a team to work on each task to complete on time, I also know how to do html website and knack, I helping making a website, I also have experience with data oracle. I work with my team on making online stores, making payments. I also have experience writing test cases and use cases. I have been working with this company for at least 2 year starting from 10/26/2020.

My strengths are in Data analysis. I am able to analyze data using statistical techniques and providing reports. Developing and implementing databases and data collection systems. Acquiring data from primary and secondary sources and maintaining data systems. identifying , analyzing, and interpreting trends or patterns in complex data sets.

My key roles are calm and collected and pulling the team to have a cooler head to work on a new project. I could be a team leader but I also learn from my other team members if I have made a mistake.

I have experience on machine learning code with python, learn how to gather the right data, and try personal machine learning projects.

My hobbies are playing around with technologies, learning new things, tools, and doing a lot of programing research and helping other people with their IT work, and making projects for myself to complete. I play around with the new tools when it realize .
